

Azets Expense: elevating expense management.

Challenges

- Outdated systems
- Multiple systems
- Requests from customers

The expense management system Azets was using was getting old, and customers were asking for more modern ways of managing employees' expenses. Azets realised that upgrading to a modern system would benefit them and their customers and began to look for alternatives.

Solution

- A white label option frees up time for Azets' core business
- Possibility to strengthen and differentiate the Azets brand with a premium expense management solution
- Less time and money on development, more value for customers

Azets decided to partner up with Findity and launched Azets Expense. With Findity's white label expense management solution, Azets spend less time and money on product development and get better value for their customers.

Results

Since launching, Azets has digitised 250+ unique customers, reaching over 32,000 users. The number of organisations and users of Azets Expense continues to grow.

250+

unique customers

Success factors

- Agile system
- A modern solution
- A partnership built for joint success

With Findity's adaptable expense management solution, Azets found a strong partner and their customers got a solution that meets their needs.

With the possibility to claim expenses, mileage, allowances, connect company cards, integrations to accounting and payroll systems, and an easy-to-use mobile app, Azets Expense is a modern solution with a low starting threshold for Azets' customers.

Azets is very pleased with our collaboration with Findity, and we strongly believe we can grow our business with Findity as our partner. We receive excellent support and service, always with the customer in focus.

Mia Strand, System Owner
