

# Findity

Faster, easier, and better expense management. **As it should be.**

## Find your flow

Automate the expense process and let technology do the boring work for you. By connecting your card, transactions are logged automatically and you just need to scan the receipt - the app handles the rest, ensuring correct reimbursements on time, every time.

## Seamless compliance

Add some ease into your administrative tasks with an app that is automatically updated to follow the latest local regulations. This covers everything from per diem allowance to privacy matters.

## Time saver

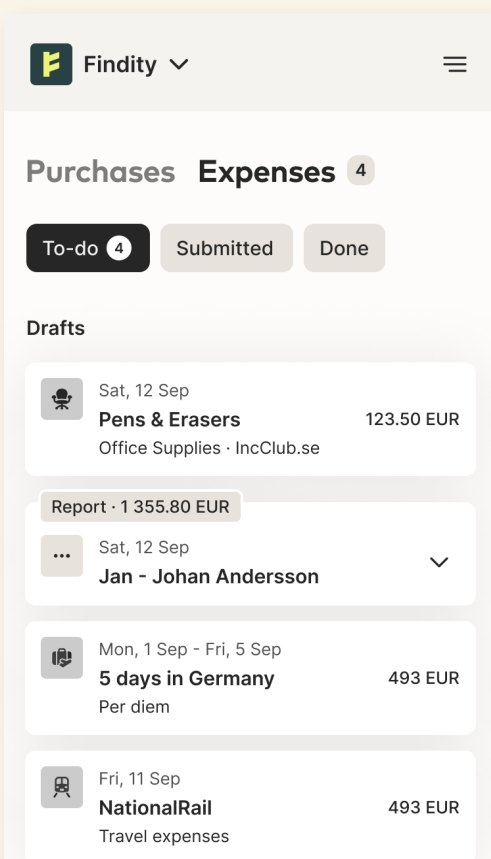

Free up your most valuable asset, time, by automating recurring processes. Less time on admin means more time for work that adds actual value to your organisation.
